CHILE: PRESIDENTIAL DECLARATION CONCERNING CONTINENTAL SHELF, 23 JUNE 1947*Considering:*

1. That the Governments of the United States of America, of Mexico and of the Argentine Republic, by presidential declarations made on 28 September 1945, 29 October 1945, and 11 October 1946, respectively, have categorically proclaimed the sovereignty of their respective States over the land surface or continental shelf adjacent to their coasts, and over the adjacent seas within the limits necessary to preserve for the said States the natural riches belonging to them, both known and to be discovered in the future;
2. That they have explicitly proclaimed the rights of their States to protect, preserve, control and inspect fishing enterprises, with the object of preventing illicit activities threatening to damage or destroy the considerable natural riches of this kind contained in the seas adjacent to their coasts, and which are indispensable to the welfare and progress of their respective peoples; and that the justice of such claims is indisputable;
3. That it is manifestly convenient, in the case of the Chilean Republic, to issue a similar proclamation of sovereignty, not only by the fact of possessing and having already under exploitation natural riches essential to the life of the nation and contained in the continental shelf, such as the coal-mines, which are exploited both on the mainland and under the sea, but further because, in view of its topography and the narrowness of its boundaries, the life of the country is linked to the sea and to all present and future natural riches contained within it, more so than in the case of any other country;
4. That international consensus of opinion recognizes the right of every country to consider as its national territory any adjacent extension of the epicontinental sea and the continental shelf;
5. That the State has the obligation to protect and guard the exploitation of the natural riches contained in this territory, on sea, on land, and in the air;

The President of the Republic hereby declares:

- (1) The Government of Chile confirms and proclaims its national sovereignty over all the continental shelf adjacent to the continental and island coasts of its national territory, whatever may be their depth below the sea, and claims by consequence all the natural riches which exist on the said shelf, both in and under it, known or to be discovered.
- (2) The Government of Chile confirms and proclaims its national sovereignty over the seas adjacent to its coasts whatever may be their depths, and within those limits necessary in order to reserve, protect, preserve and exploit the natural resources of whatever nature found on, within, and below the said seas, placing within the control of the government especially all fisheries and whaling activities with the object of preventing the exploitation of natural riches of this kind to the detriment of the inhabitants of Chile and to prevent the spoiling or destruction of the said riches to the detriment of the country and the American continent.
- (3) The demarcation of the protection zones for whaling and deep sea fishery in the continental and island seas under the control of the Government of Chile will be made in virtue of this declaration of sovereignty at any moment which the Government may consider convenient, such demarcation to be ratified, amplified, or modified in any way to conform with the knowledge, discoveries, studies and interests of Chile as required in the future. Protection and control is hereby declared immediately over all the seas contained within the perimeter formed by the coasts and the mathematical parallel projected into the sea at a distance of 200 nautical miles from the coasts of Chilean territory. This demarcation will be calculated to include the Chilean islands, indicating a maritime zone contiguous to the coasts of the said islands, projected parallel to these islands at a distance of 200 nautical miles around their coasts.
- (4) The present declaration of sovereignty does not disregard the similar legitimate rights of other States on a basis of reciprocity, nor does it affect the rights of free navigation on the high seas.

PERU: SUPREME DECREE NO. 781 OF 1 AUGUST 1947

THE PRESIDENT OF THE REPUBLIC;

Considering:

That the continental submerged shelf forms one entire morphological and geological unit with the continent;

That the shelf contains certain natural resources which must be proclaimed as our national heritage;

That it is deemed equally necessary that the State protect, maintain and establish a control of fisheries and other natural resources found in the continental waters which cover the submerged shelf and the adjacent continental seas in order that these resources which are so essential to our national life may continue to be exploited now and in the future in such a way as to cause no detriment to the country's economy or to its food production;

...

That the right to proclaim sovereignty and national jurisdiction over the entire extension of the submerged shelf as well as over the continental waters which cover it and the adjacent seas in the area required for the maintenance and vigilance of the resources therein contained, has been claimed by other countries and practically admitted in international law (Declaration of the President of the United States of 28 September 1945; Declaration of the President of Mexico of 29 October 1945; Decree of the President of the Argentine Nation of 11 October 1946; Declaration of the President of Chile of 23 June 1947);

...

That in fulfilment of its sovereignty and in defence of national economic interests it is the obligation of the State to determine in an irrefutable manner the maritime domain of the Nation, within which should be exerted the protection, conservation and vigilance of the aforesaid resources;

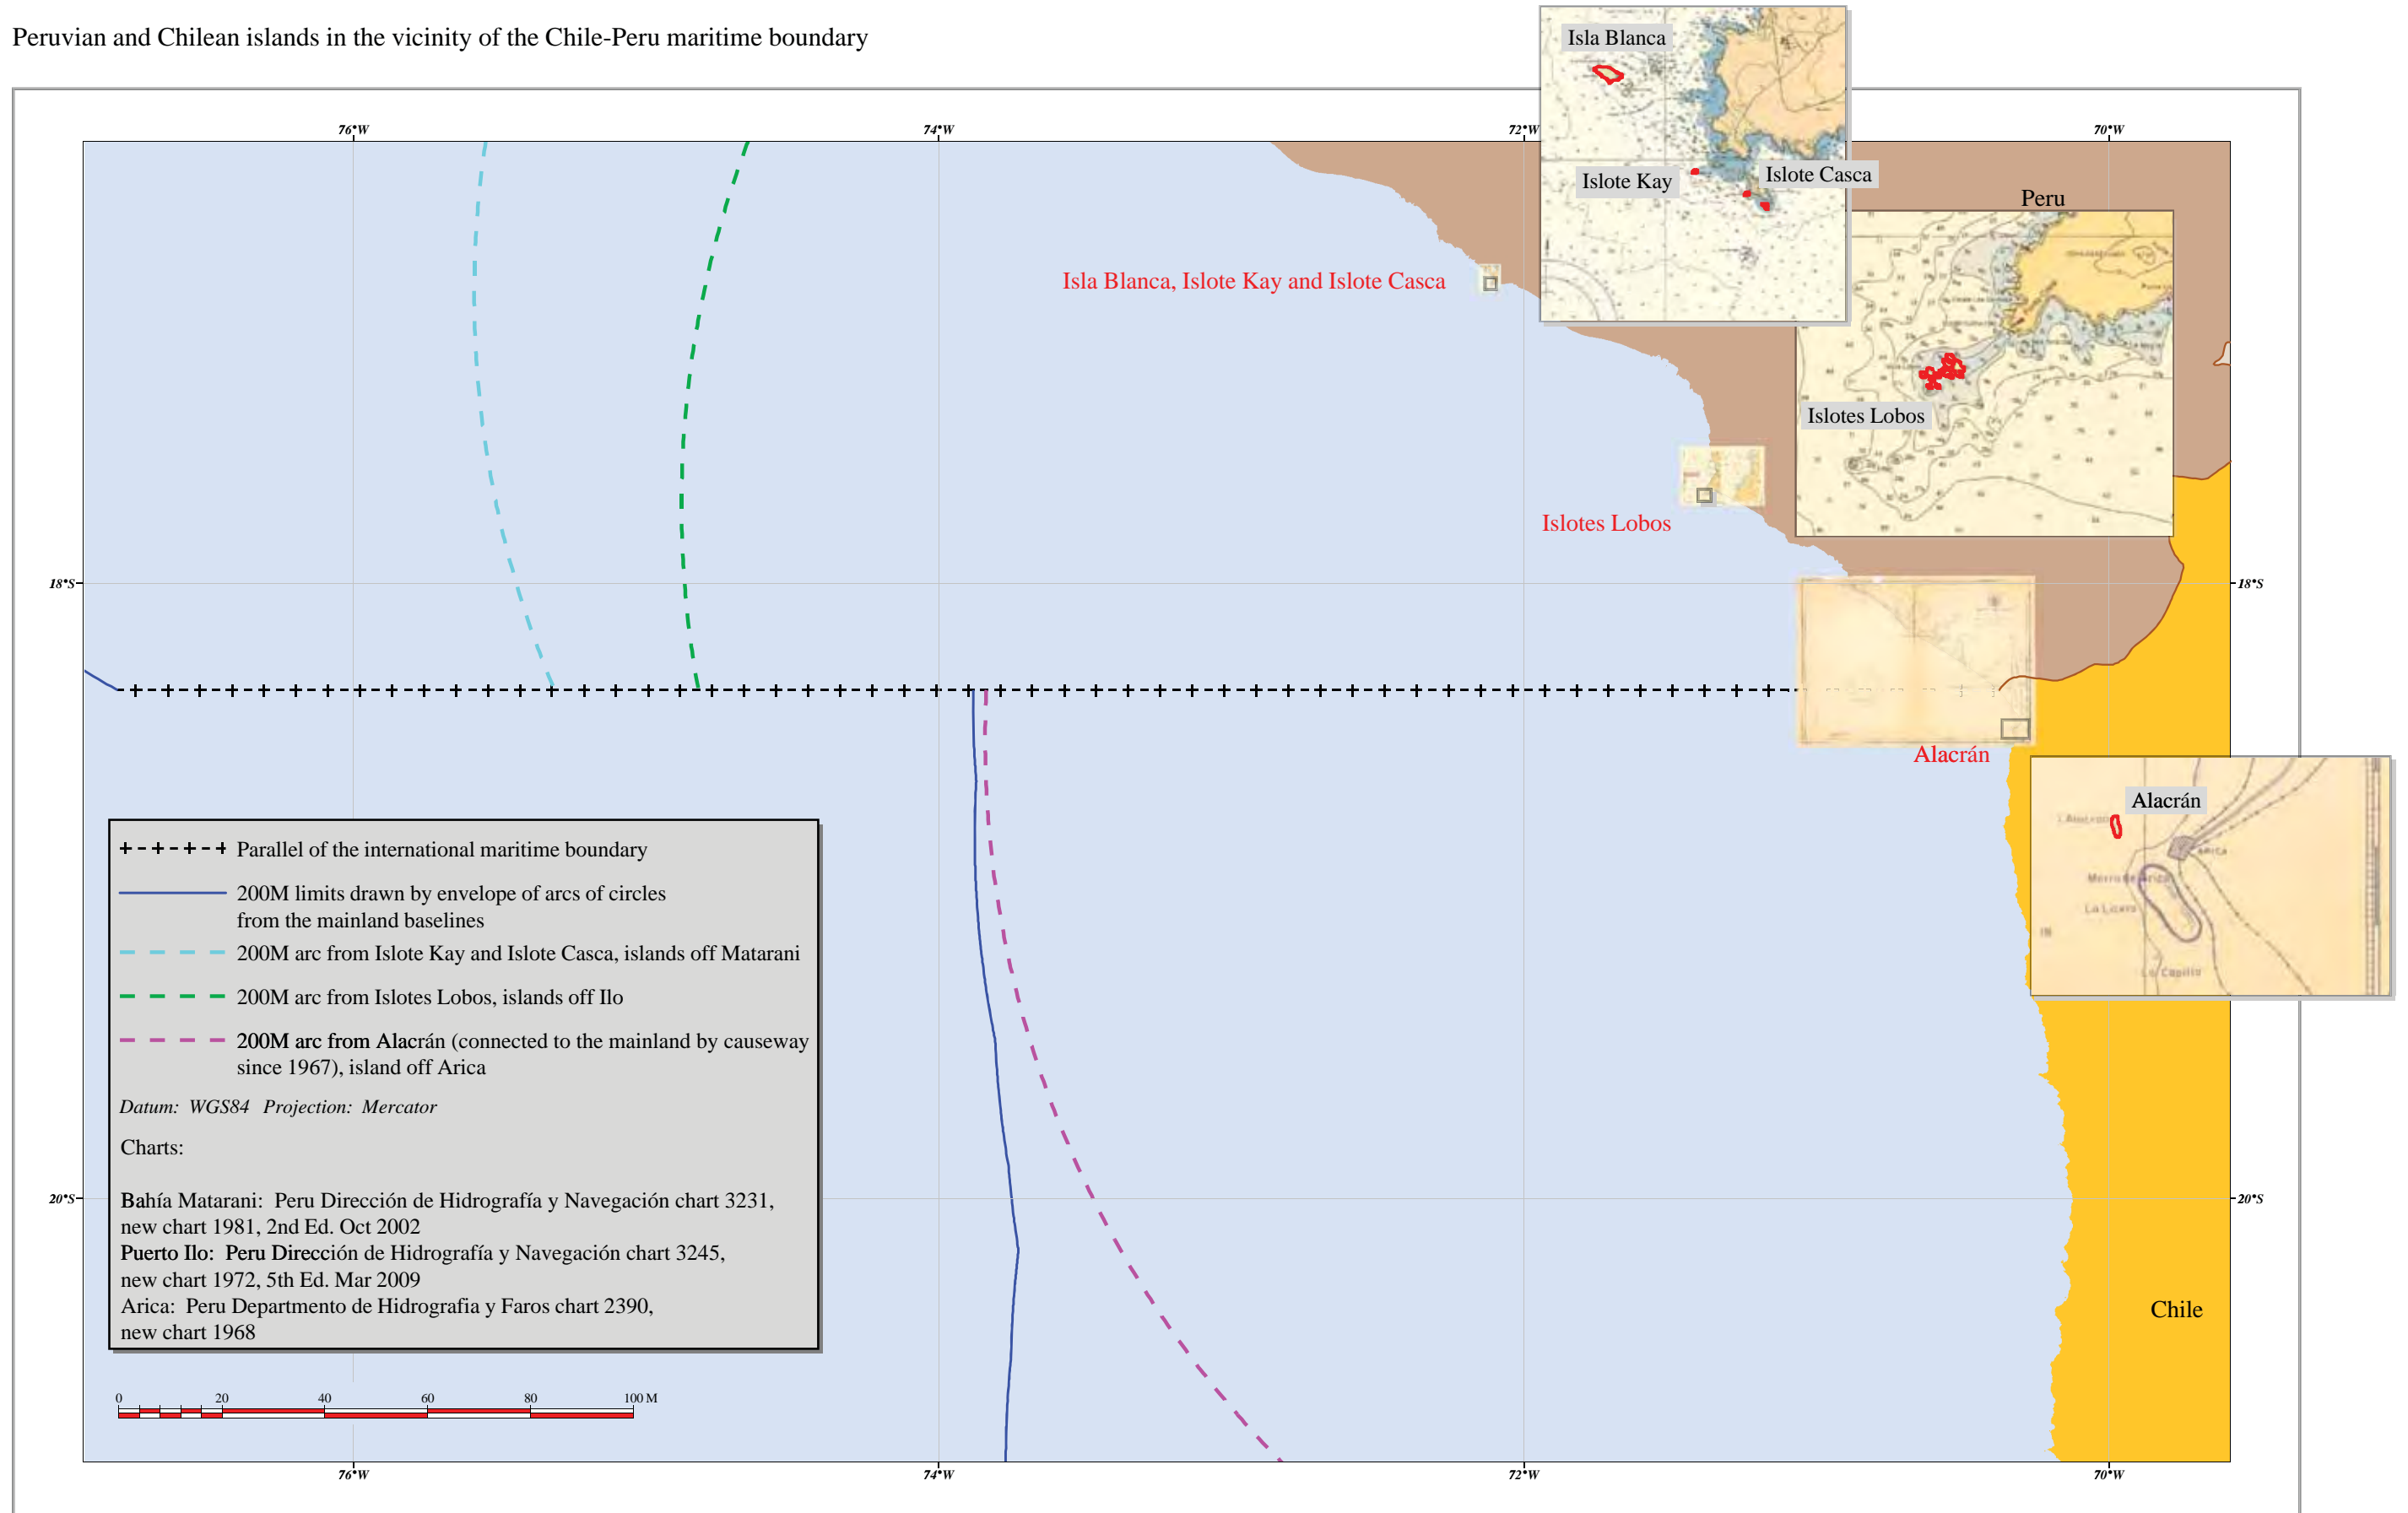

With the advisory vote of the Cabinet:

Decreases:

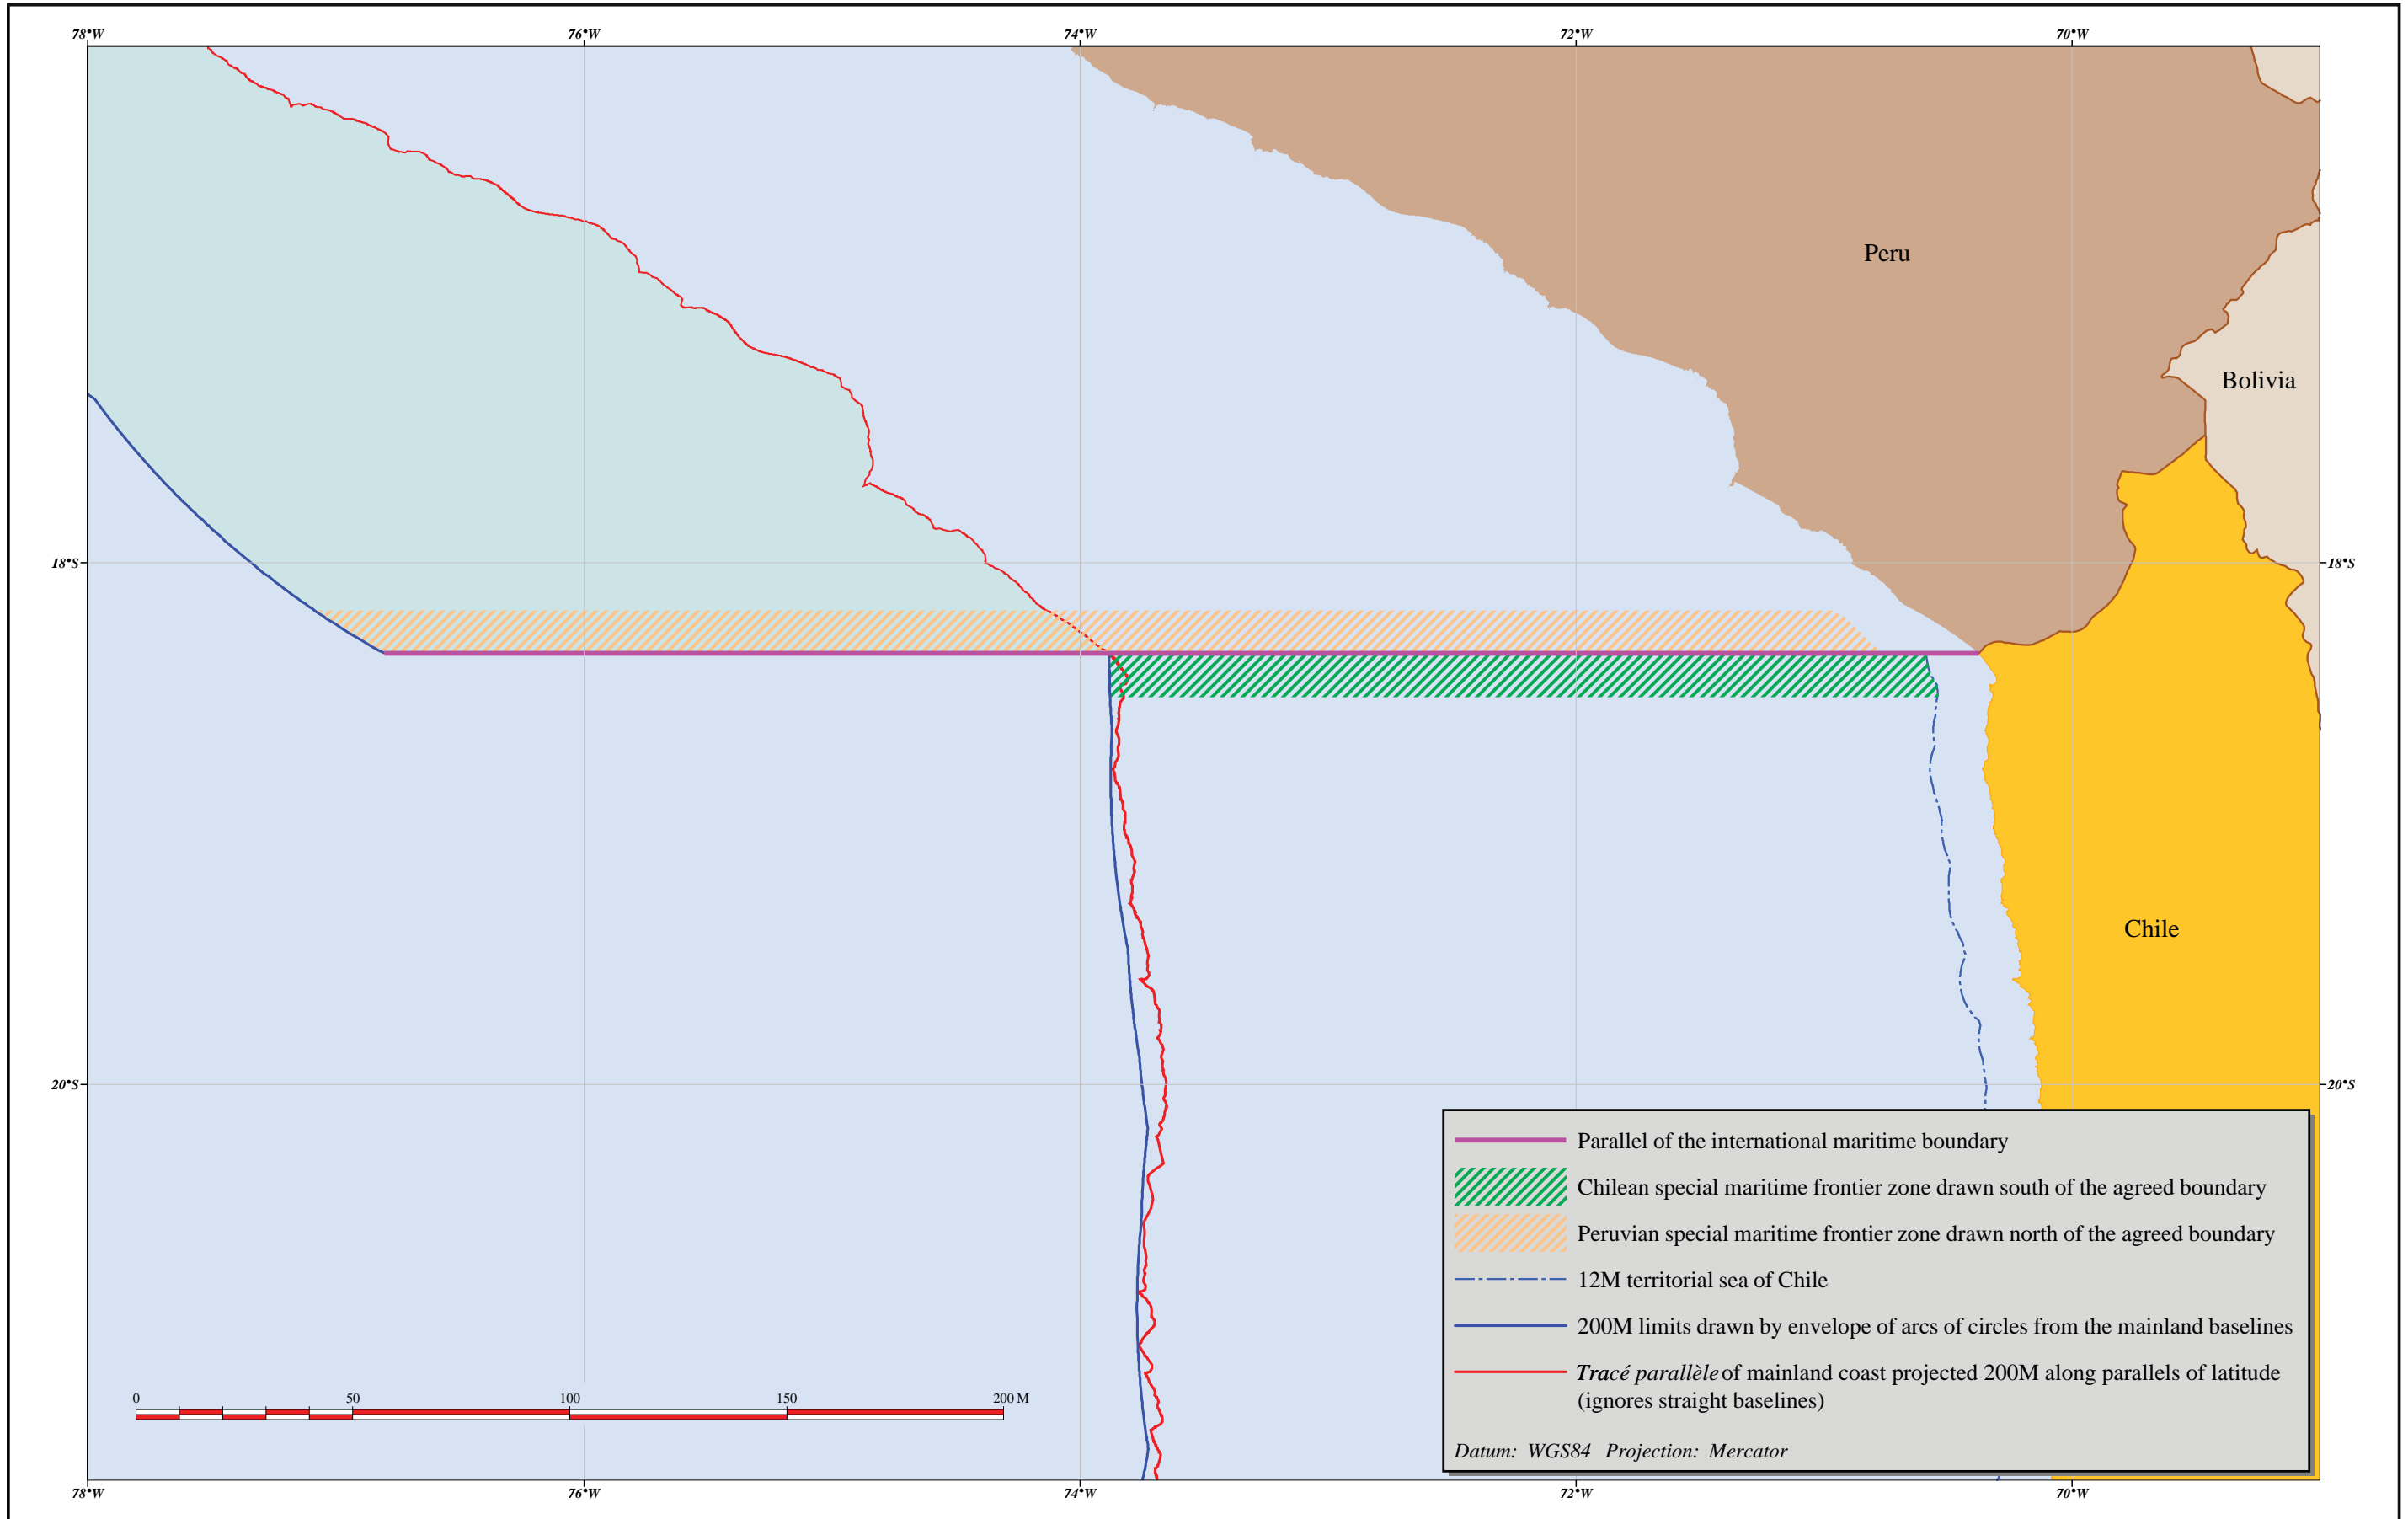

1. To declare that national sovereignty and jurisdiction are extended to the submerged continental or insular shelf adjacent to the continental or insular shores of national territory, whatever depths and extension of this shelf may be.
2. National sovereignty and jurisdiction are exercised as well over the sea adjoining the shores of national territory whatever its depth and in the extension necessary to reserve, protect, maintain and utilize natural resources and wealth of any kind which may be found in or below those waters.
3. As a result of previous declarations the State reserves the right to establish the limits of the zones of control and protection of natural resources in continental or insular seas which are controlled by the Peruvian Government and to modify such limits in accordance with supervening [*sic*] circumstances which may originate as a result of further discoveries, studies or national interests which may become apparent in the future and at the same time declares that it will exercise the same control and protection on the seas adjacent to the Peruvian coast over the area covered between the coast and an imaginary parallel line to it at a distance of two hundred (200) nautical miles measured following the line of the geographical parallels. As regards islands pertaining to the Nation, this demarcation will be traced to include the sea area adjacent to the shores of these islands to a distance of two hundred (200) nautical miles, measured from all points on the contour of these islands.
4. The present declaration does not affect the right to free navigation of ships of all nations according to international law.

Diagram showing inaccuracies in the illustration at Figure R-2.9 of Peru's Reply

Extract of Peru's figure R-2.9 fitted to WGS84 using the listed positions of Hito No. 1 and Point 266. Added detail corresponds to that shown in the right-hand side illustration.

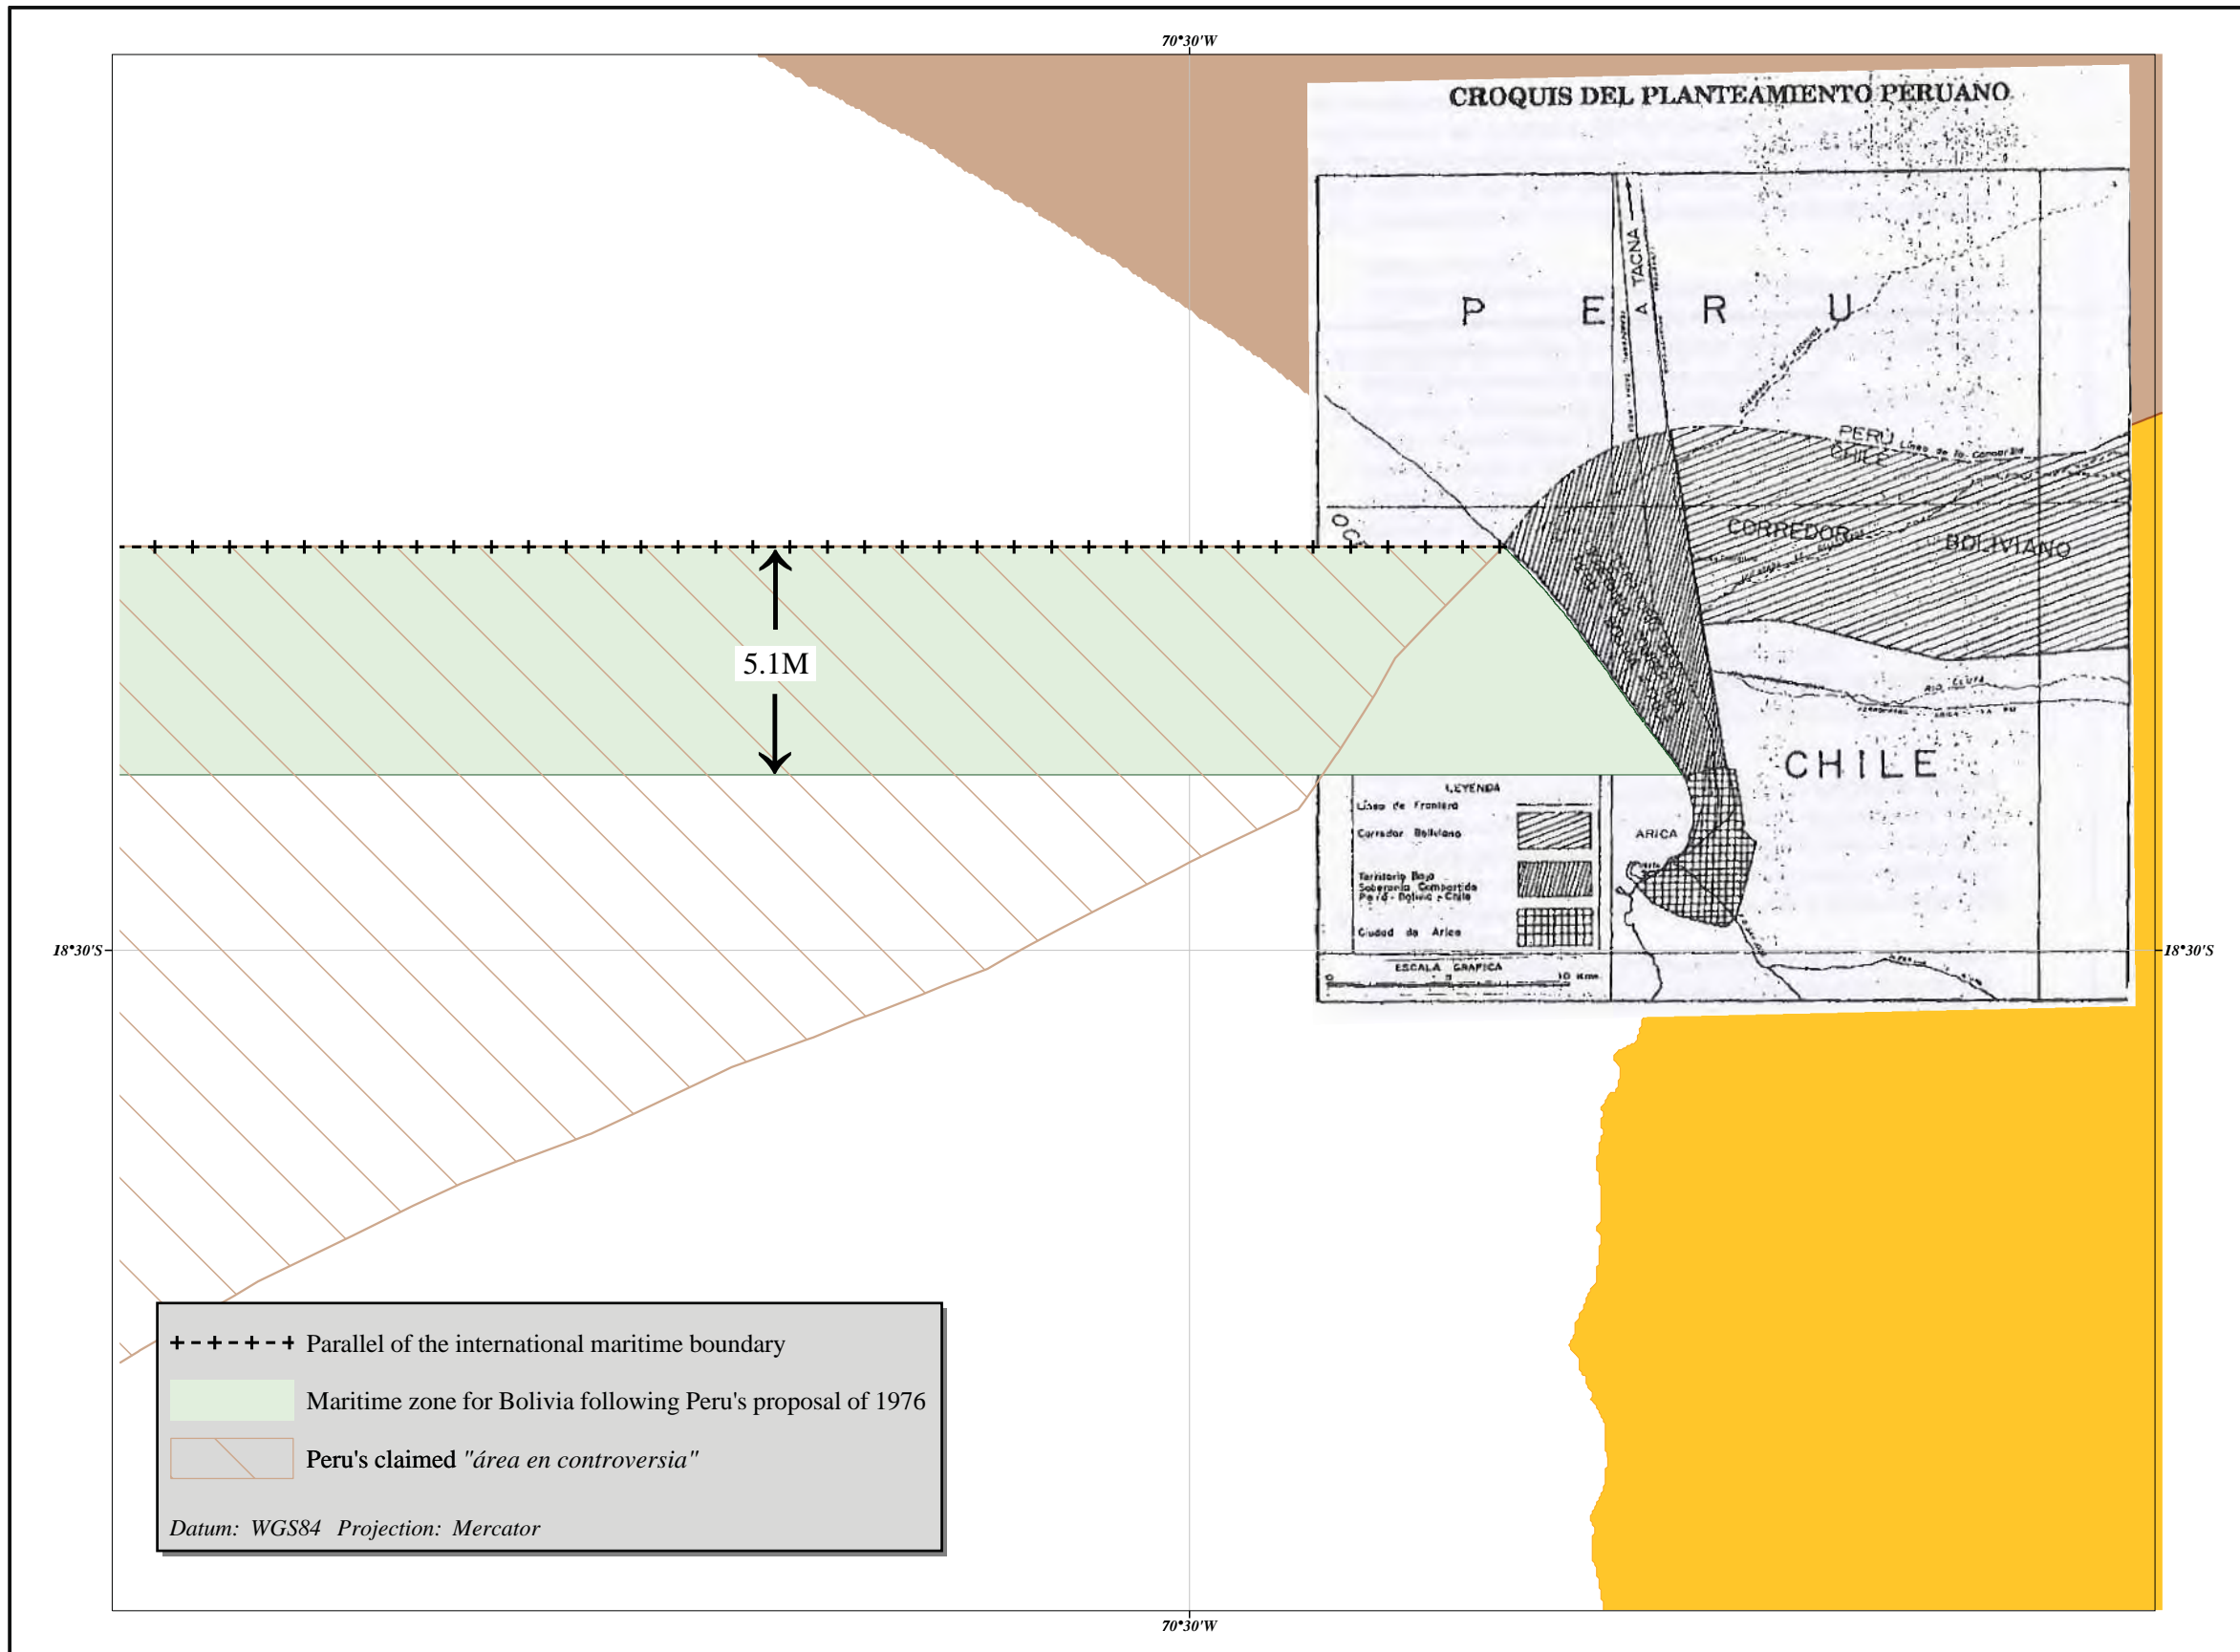

The backdrop of this illustration is taken from Google Earth imagery dated 13 May 2010. It is reproduced at an approximate scale of 1 : 2,500 when printed at A3 landscape

Chart I, Arica - Iquique published by the Chilean Navy in 1954 at a scale of 1:500,000 superimposed with the parallel of Hito No. 1 and with a 20x enlargement of the coast at the parallel.

The enlargement of the relevant section of coast shows the relative positions of Hito No. 1 and the Peruvian point 266. The magnified inset shows the points to be 10.6mm apart on paper but at the natural scale of the 1954 chart, the distance between the points is 0.53mm. The distance from Hito No. 1 to the low waterline shown on this 1954 chart is far less, a mere 0.3mm on the chart.

Alta mar area arising from the agreed maritime boundary between Chile and Argentina with hypothetical median line

The boundary is depicted according to the Treaty of Peace and Friendship between Chile and Argentina, signed at Vatican City on 29 November 1984, 1399 UNTS 89 (entered into force 2 May 1985). The hypothetical median line from the entrance to Beagle Channel to the 200M limit has been added for comparison.
